Summary

Business and clinical data analyst specializing in healthcare analytics, Epic Clarity SQL, and performance improvement. Experienced with heart failure quality metrics, readmissions, and enterprise BI tooling including Power BI and GCP-based stacks. Bridges technical and non-technical stakeholders to deliver data products that improve outcomes and reduce costs.

Experience

Data Engineer

Aug 2025 – Present

AdventHealth, Orlando, Florida

- Design and maintain SQL- and Python-based data pipelines that move Epic Clarity and EDW data into curated marts for clinical and operational reporting.
- Productionize heart failure and readmissions metrics—including I/O compliance, GDMT discharge, EF capture, and O/E mortality—used in enterprise Power BI dashboards.
- Collaborate with clinicians, finance, and IT to scope data engineering requirements, improve data quality, and document metric definitions for governance.

Skills: Epic Clarity; SQL; Python; Power BI; Enterprise Data Warehouse; Healthcare quality metrics

Business Analyst II

Jan 2025 – Aug 2025

AdventHealth, Orlando, Florida

- Partner with clinical and operations teams to define data requirements for performance and quality improvement initiatives.
- Design SQL-based reporting pipelines and Power BI dashboards for inpatient care and readmissions metrics.
- Support data validation and reconciliation efforts across Epic Clarity and enterprise data warehouse (EDW) environments.

Skills: Epic Clarity; SQL; Power BI; Enterprise Data Warehouse; Healthcare quality metrics

Analytics Engineer

Apr 2022 – Apr 2024

Penske Media Corporation, Los Angeles, California

- Owned analytics and data engineering for a portfolio of 30+ media brands, building Python- and SQL-based pipelines in GCP and Looker to deliver subscriber and content performance reporting.
- Fine-tuned large language models and evaluated AI/data vendors, improving generation quality by ~10% and informing \$5M in platform investment decisions.
- Increased subscription conversion and retention by modeling first-party behavior on billions of records in Treasure Data CDP and pushing high-value segments into targeted campaigns.

Skills: Python; SQL; GCP; Looker; Treasure Data CDP; Large language models; Subscription analytics; Customer segmentation

Independent Data Consultant

Jan 2020 – Apr 2022

BTJN, Houston, Texas

- Implemented two customer data platforms to improve audience segmentation and campaign targeting for 2M+ high-value prospects.
- Migrated three legacy systems to GCP, doubling data processing speeds and streamlining analytics workflows.
- Automated email marketing pipelines that converted 10% of 5,000 cold leads into qualified clients.

Skills: GCP; Customer data platforms; Marketing automation; ETL and system migration

Research Assistant

Jan 2018 – Aug 2019

University of Central Florida, Orlando, Florida

- Designed a rubric for coding international human rights violations using statutes from major global treaties.
- Led a five-person research team to develop an open-source MySQL database documenting systemic abuses across global conflict zones.
- Co-authored an analysis on gender-based violence published by De Gruyter and presented at the International Criminal Court in The Hague.
